Panther SP

AP Control LSO

The Panther SP spinal brace is indicated for the patient with moderate to severe low-back pain. The breathable mesh and the rigid Kydex posterior plate combine to provide comfortable LSO control.

The string-and-pulley compression system allows the brace to be easily snugged, even by elderly arthritic hands.

The universal Panther SP requires no tools to size. There’s no need to cut or fold a belt. Just add or remove belt segments.

PDAC Approved: L0631/L0648
