

LEOPARD ONE SP

One means one size!

The Universal Leopard SP spinal brace is indicated for the patient with moderate to severe low-back pain. The luxurious tri-laminate fabric and the rigid Kydex posterior plate combine to provide comfortable lumbo-sacral control.

The quad-strap compression system snugs the brace firmly.

The Leopard SP is easy to fit. Set the size by trimming and reattaching the lateral extensions, reset the straps, don and tighten. That's it!

PDAC Approved: L0631/L0648
