

Panther Pro 637 & 456

Max APL Control

The Panther Pro will almost always require custom fitting because of its rigid posterior-lateral shells. These shells must be precisely fitted by heat remolding, hardly a self-adjustment operation!

The Panther Pro comes in two sizes, Petite & Grande, and in two styles, LSO & TLSO. It is designed for patients who require the aggressive support and control of a custom-fitted rigid orthoses. For these patients, lightweight and flimsy off-the-shelf spinal braces are insufficient.

When the doctor orders a "real" brace, choose the "Orthosis for Orthotists," the Panther Pro!

The breathable mesh offers comfort and the rigid Kydex posterior-lateral shell provides support & control. The string and pulley compression system allows the brace to be easily snugged, even by elderly arthritic hands.

PDAC Approved LSO: L0637/L0650

PDAC Approved TLSO : L0456/L0457
